“Wetland Applications Remote Sensing and GIS”

Date: 21-22 February, 2018

Training and Research in Earth Eco-system (TREES)

A Two-days training short course was conducted on **“Wetland Applications Remote Sensing and GIS”**. The training programme was attended by 7 participants from 3 institutes / organisations.

Overall 6 lectures on remote sensing covered Basic principles of Remote Sensing and its broader Applications, covering various aspects of Satellite based wetland Applications were delivered. Besides these lectures on Android App and applications for wetland information dissemination, Lecture cum Hands on exercise for wetlands database preparation were covered. Basics of Geographic Information System and

Hands on training for geospatial analysis (ARC-GIS, QGIS) use of GPS for field data collection utilities were covered.

Feedback received was encouraging, many of participants showed interest to work with SAC/ISRO collaborative projects and students wanted to be part of TREES Research Programme.
