Inauguration of Ocean Mixing and Monsoon Workshop Cum discussion meeting at SAC during January 21-28, 2020
Inauguration of Ocean Mixing and Monsoon (OMM) Workshop Cum discussion meeting at Space Applications Centre

- Shri D K Das, Director SAC, inaugurated a four-day workshop on “Air-sea interactions in Bay of Bengal”. This workshop is being conducted from January 21-24, 2020 in Space Application Centre, followed by a two-day technical discussion during January 27-28.

- This event is conducted under a dedicated, collaborative programme called Ocean Mixing and Monsoon (OMM) which is aimed towards our understanding of air-sea interaction and oceanographic processes in the Bay of Bengal. The major emphasis of present workshop is utilization of satellite data for the large scale and in situ data for the finer scale air-sea exchange processes in Bay of Bengal.

- Over 22 young researchers from various institutes are attending the training program. There are 6 mentors from US and India who are guiding these researchers.

- The two day technical sessions on January 27-28, 2020 will be attended by around 90 participants from US and India.
